FRESH PACK

Indianapolis Fruit Company

is an organic distributor, handler, and processor that is certified by the USDA. This enables us to repackage, sort, and distribute certified organic and conventional products to your store or warehouse in accordance with USDA organic requirements. Organic and conventional commodities such as Garden Organic and Garden Best, are all packaged in Clam Shell, Bagged, or Oververwrapped.

PACKAGING

Packaging these things helps to improve shelf life by protecting them from the constant air flow generated by refrigerated cases. It aids in the preservation of Certified Organic items by preventing them from coming into contact with conventional products. It allows shops to shift conventionally packaged commodities, which is beneficial to the Garden Best. All Garden Organic and Garden Best products have their own unique UPCs, and because each item is labeled, the labels enable a level of traceability down to an individual unit or package, not just a case value.

FEATURES

- Textwrap Automatic In-Line Sealer
- GTIN Ready
- Product Traceability
- HCAAP Facility Certified
- ICO Organic Facility Certified
- RPC Capabilities
- Custom Split Case Capabilities
- Single Wrap Sealed Products
- Tray Pack and Clamshell Programs
- Bagged Citrus and Vegetable Capabilities
- ECO Tray Packed Organic Vegetable Program
- ECO Tray Packed Organic Fruit Program
- Organic Greak Case Certified

BREAK CASE

Products not in the presentation are all break case items, which allow retailers to acquire items in reduced amounts in the case, which can help smaller stores save shrink by avoiding the purchase of whole cases that may break down before sale through.

PACKAGING

Our **Clysar® Produce Shrink Film** is designed to protect and preserve respiring fruit and vegetables while using sustainable resources. Our polyfin shrink film extends shelf life and minimizes food waste while protecting products from contamination.

Our eco-friendly packaging is a win-win for your customers and the environment.

FEATURES

Alleviates Air

Micro-perforations allow respiring fruits and vegetables to breathe

Locks in Freshness

Controls perspiration and water loss, extending shelf life

Maintains Cleanliness

Protects against contaminants during distribution and consumer handling

Shrinks Beautifully

Shrinks evenly and tightly around unique produce shapes

Shines at Retail

Delivers outstanding optics and can be printed with colorful graphics, eliminating secondary labeling

WHY SHRINK WRAP PRODUCE?

Broccoli wrapped in crystal clear Clysar® film demonstrates these benefits:

- Prevents 33% moisture loss over 6 days
- Stays greener
- Retains more ascorbic acid (Vitamin C)
- Keeps broccoli clear and protected
- Stops condensation from clouding the film

CONVENTIONAL FRUIT

HASS AVOCADO

Item #: 18680
