# ABOUT GARDEN CUT

**Take the production out of your kitchen. Leave it to us.**

Our Fresh Cut Division offers made-to-order processing of fresh fruits and vegetables and unique products for retail.

## Why use Garden Cut?

- Reduce labor cost
- Minimize Product Shrink
- Minimize your Food Safety liability

Garden Cut helps consumers by taking extra preparation out of the kitchen.

Garden Cut is an SQF certified facility, which undergoes annual certification audits and unannounced regulatory inspections. We have a fully-documented food safety program that minimizes the potential of contamination to occur during receiving, storage, processing, and shipment of products.

## We are proud to offer:

- Staple items from the fresh-cut category such as lettuce, onions, peppers, apples and melons.
- Unique selections such as butternut squash, fruit salad, and veggie noodles.
- A certified organic processing facility with a selection of retail and food service items.
- Kosher-certified facility with a full selection of Kosher offerings.
- Oven-ready, skillet, and grill products. We offer an assortment of food service blends as well as retail oven, skillet, and grill ready items.

# HANDLING GUIDE

**Garden Cut's adherence to the cold chain ensures low shrink and optimal consumer quality.**

## At the Garden Cut Production Facility:

Proper temperature and handling control ensures product integrity and extends shelf life, resulting in increased sales and repeat purchases.

Temperature-controlled and monitored trailers transport your products, which are adjusted to appropriate temperature parameters. Temperatures of 34-40° F are used to ship, store, and display fresh-cut food.

### Cooler / Backroom:

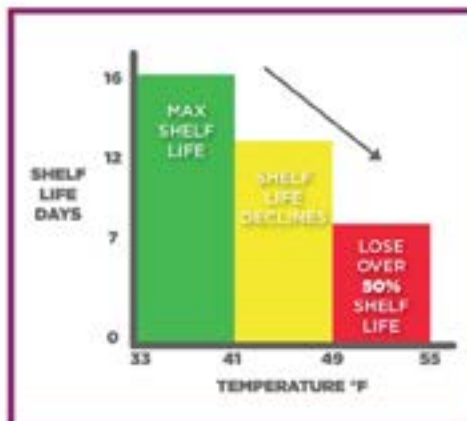

- The ideal humidity level is between 90 and 95%.
- Please do not spray or mist.
- Freshly cut produce should be kept in the cooler's coldest section.
- It's best not to put the produce immediately in front of the blowers, as this can cause it to freeze.
- Until ready to use, keep bags and boxes tightly closed.
- Avoid putting fresh-cut produce near ethylene-emitting items, which can hasten ripening and aging.

## Upon Delivery to your store:

- Check the temperature of the trailer and the product.
- Open many boxes and look for unsealed or cracked containers, as well as high temperatures.
- All fresh-cut produce should be refrigerated right away in the appropriate storage facility.
- Never allow fresh-cut produce to stay outside refrigeration.

### Sales Floor:

- Keep the products temperature 34-40° F.
- Fresh-cut items should be rotated according to the 'Best if used by' date.
- Display Fresh-cut items in many departments.
- Do not stack too high or too deep. Cold air must be circulated, and temperature checks should be performed on a regular basis.
- Never sell any fresh-cut produce that is of low quality or out of date for health and safety concerns.

**From our facility to yours, the cold chain is constantly monitored.**
