

11/21/18

To Our Valued Customers:

At this point according to the CDC report, the concern affected dates of incidents are Oct 8-31 which is product from the Salinas Valley. We transitioned to Yuma, AZ November 9.

We have not been contacted by any government agency in regards to this matter. As of 11/20, there is no baby romaine leaf lettuce in our spring mix and a pallet tag will be placed on each pallet stating no romaine.

Thank you,

Joyce Camany
